PROFESSIONAL SUMMARY

Senior AI & Full-Stack Engineer with 10+ years of professional software engineering experience, including 10+ years architecting enterprise Laravel/PHP systems, 7+ years building reactive Vue/Nuxt applications, and extensive production experience developing AI agents, LLM integrations, and automated SaaS pipelines.

Demonstrated expertise owning distributed architectures, REST APIs, asynchronous media processing pipelines (FFmpeg, WebSockets, Redis), and cloud infrastructure across AWS (EC2, RDS, Lambda, S3, Docker). Proven history driving high-availability systems with 99.9% uptime for Australia, Singapore, and US tech companies in fast-paced, asynchronous remote environments. Passionate about leveraging autonomous AI agents and workflow automation to eliminate operational friction and accelerate engineering velocity.

CORE TECHNICAL SKILLS

AI Engineering & Automation: Autonomous AI Agents, LLM Integration (OpenAI API, Anthropic Claude, Gemini), Function Calling / Tool Use, Prompt Engineering, Agentic Workflows, Supabase Edge Functions, Automated Data Pipelines, AI-Assisted Engineering (Claude Code, Codex CLI)

Backend Architecture: Laravel (PHP), NestJS, Node.js, REST APIs, WebSockets, Redis, Microservices, Event-Driven Architecture, Queues & Background Workers, Service-Oriented Systems

Frontend Engineering: Vue.js (Vue 2 & 3), Nuxt.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, SCSS, State Management (Pinia, Vuex), Responsive Design

Cloud, Infrastructure & DevOps: AWS (EC2, RDS, S3, CloudFront, Lambda, ECR), Docker, Linux / Ubuntu Server Administration, Cloudflare, Terraform, CI/CD (GitHub Actions, Bitbucket Pipelines, GitLab CI)

Databases & Data Modeling: PostgreSQL, MariaDB, MySQL, Supabase, Row-Level Security (RLS), Schema Design, Indexing, Query Optimization, Caching Strategies

Specialized Systems & Practices: FFmpeg Video/Audio Pipelines, Electron.js Desktop Apps, TDD, Automated Testing (PHPUnit, Jest), API Security & Rate Limiting, System Observability & Monitoring

PROFESSIONAL EXPERIENCE

Senior AI & Full-Stack Engineer / Senior Laravel Developer

April 2024 - Present

Confidential Client · Australia · Remote

- Architect and maintain enterprise-grade production applications using Laravel, PHP, and AWS, consistently upholding 99.9% uptime across SLA-driven client projects.
- Integrate modern frontend applications built with Next.js, Gatsby, and Vue.js into decoupled REST API backend services and asynchronous queue pipelines.
- Implement AI-assisted engineering workflows and autonomous agent tooling (OpenAI API, Claude Code, Codex CLI) to automate boilerplate generation, test synthesis, and rapid issue triage.
- Direct cloud infrastructure deployments across AWS (EC2, S3, RDS), Kinsta, and Ploi, automating provisioning, SSL lifecycle, and database backup routines.
- Collaborate asynchronously with cross-functional Australian engineering teams, conducting code reviews, establishing API contracts, and troubleshooting complex production bottlenecks.

Stack: Laravel, PHP, Vue.js, Next.js, Gatsby, AWS

Senior Full-Stack Developer

April 2025 - December 2025

Bubio · Singapore · Remote

- Architected and implemented secure REST APIs and backend microservices supporting core customer-facing features and internal operational dashboards.
- Deployed Supabase Edge Functions for real-time automation, webhooks, and asynchronous background event processing.
- Configured enterprise PostgreSQL Row-Level Security (RLS) policies to guarantee multi-tenant data isolation and enforce zero-trust access control.
- Designed database schemas, optimized complex relational queries, and built administrative tools that reduced manual support overhead by 40%.
- Partnered with product and frontend engineers across distributed Singapore time zones to ship scalable features on tight release cycles.

Stack: Supabase, PostgreSQL, REST APIs, Microservices

Senior Full-Stack Developer

January 2024 - December 2025

Imaginary Ones · Singapore · Remote

- Designed and built high-performance REST APIs and microservices using NestJS, Node.js, and Laravel for high-concurrency web applications.
- Optimized query execution plans, MariaDB/PostgreSQL indexing, and Redis caching layers, cutting 95th-percentile API response latency by 35%.
- Containerized backend workloads with Docker and established automated continuous integration/continuous delivery (CI/CD) pipelines using Bitbucket Pipelines.
- Provisioned and monitored AWS cloud infrastructure across EC2, RDS, S3, Lambda, and ECR, guaranteeing zero-downtime rolling deployments.

Stack: NestJS, Node.js, Laravel, PostgreSQL, MariaDB, Redis, Docker, AWS

Senior Full-Stack Developer

April 2018 - December 2025

OFFEO · Singapore · Remote

- Owned the core backend architecture and cloud infrastructure for a high-volume SaaS video creation platform handling over 100,000 video exports and millions of media assets.
- Architected a distributed video rendering and export engine uniting Node.js, FFmpeg, Laravel queues, Redis, and AWS S3, reducing rendering failures to under 0.1%.
- Implemented real-time export progress tracking via WebSockets and Redis Pub/Sub, delivering sub-second status updates to Nuxt.js frontends.
- Developed and maintained cross-platform desktop applications using Electron.js for macOS and Windows.
- Tuned MariaDB database schemas, indexes, and complex queries to process high-throughput concurrent video generation jobs efficiently.
- Led technical mentoring and code reviews for junior and mid-level software engineers.

Stack: Node.js, Laravel, FFmpeg, Redis, AWS, Nuxt.js, Electron.js, MariaDB

Senior Developer / Team Lead

January 2016 - January 2018

Skubbs Inc. · Philippines

- Led a team of software engineers building bespoke web applications, enterprise dashboards, and e-commerce platforms.
- Formulated technical architecture, deployment architectures, and engineering estimates for multiple simultaneous client initiatives.
- Communicated technical specifications with stakeholders and delegated development milestones to ensure timely project delivery.

Web Developer

May 2014 - January 2016

Open Access BPO · Philippines

- Engineered custom WordPress themes, plugins, and internal corporate tools in direct collaboration with the Chief Technology Officer (CTO).

Stack: WordPress

Web Developer

November 2013 - April 2014

AGR Operations · Manila, Philippines

- Converted complex UI/UX designs into responsive, cross-browser compliant HTML5/CSS3 web interfaces.

Stack: HTML5, CSS3

SELECTED PROJECTS

ExpresswayPH (<https://expresswayph.com>)

Founder & Lead Developer

Solo-engineered high-performance Philippine travel and toll-calculation utility built with Nuxt.js and serverless architecture.

- Features real-time toll calculations, route planning, and fuel cost estimations serving thousands of active motorists.

Stack: Nuxt.js, Serverless

LunchOnline.us (<https://lunchonline.us>)

Lead Full-Stack Developer

Enterprise B2B corporate catering platform built with NestJS, Nuxt.js, PostgreSQL, Tailwind CSS, and Docker on AWS.

- Architected role-based ordering, corporate wallet systems, and automated logistics pipelines.

Stack: NestJS, Nuxt.js, PostgreSQL, Tailwind CSS, Docker, AWS

AlagaNow

Lead Full-Stack Developer

Pet-services marketplace platform built with modern API-first architecture using NestJS, Nuxt.js, and PostgreSQL.

Stack: NestJS, Nuxt.js, PostgreSQL
