PROFESSIONAL SUMMARY

Senior AI & Full-Stack Engineer with 10+ years of professional software engineering experience, including 10+ years architecting enterprise Laravel/PHP systems, 7+ years building reactive Vue/Nuxt applications, and extensive production experience developing AI agents, LLM integrations, and automated SaaS pipelines.

Demonstrated expertise owning distributed architectures, REST APIs, asynchronous media processing pipelines (FFmpeg, WebSockets, Redis), and cloud infrastructure across AWS (EC2, RDS, Lambda, S3, Docker). Proven history driving high-availability systems with 99.9% uptime for Australia, Singapore, and US tech companies in fast-paced, asynchronous remote environments. Passionate about leveraging autonomous AI agents and workflow automation to eliminate operational friction and accelerate engineering velocity.

CORE TECHNICAL SKILLS

AI Engineering & Automation: Autonomous AI Agents, LLM Integration (OpenAI API, Anthropic Claude, Gemini), Function Calling / Tool Use, Prompt Engineering, Agentic Workflows, Supabase Edge Functions, Automated Data Pipelines, AI-Assisted Engineering (Claude Code, Codex CLI), Model Context Protocol (MCP)

Backend Architecture: Laravel (PHP), NestJS, Node.js, REST APIs, WebSockets, Redis, Microservices, Event-Driven Architecture, Queues & Background Workers, Service-Oriented Systems

Frontend Engineering: Vue.js (Vue 2 & 3), Nuxt.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, SCSS, State Management (Pinia, Vuex), Responsive Design

Cloud, Infrastructure & DevOps: AWS (EC2, RDS, S3, CloudFront, Lambda, ECR), Docker, Linux / Ubuntu Server Administration, Cloudflare, Microsoft Azure, Terraform, CI/CD (GitHub Actions, Bitbucket Pipelines, GitLab CI)

Databases & Data Modeling: PostgreSQL, MariaDB, MySQL, Supabase, Row-Level Security (RLS), Schema Design, Indexing, Query Optimization, Caching Strategies

Specialized Systems & Practices: FFmpeg Video/Audio Pipelines, Electron.js Desktop Apps, TDD, Automated Testing (PHPUnit, Jest), API Security & Rate Limiting, System Observability & Monitoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer

April 2024 - Present

Cloudstaff · Remote · Confidential Australian Client

- Develop and maintain SLA-driven Laravel systems for a confidential Australian client, consistently upholding 99.9% uptime across production applications.
- Deliver high-priority features across multiple simultaneous projects under tight timelines, collaborating asynchronously with distributed, fully remote engineering teams.
- Integrate Next.js and Gatsby frontends with decoupled Laravel REST APIs and asynchronous queue pipelines.
- Manage infrastructure deployments across AWS, Azure, Kinsta, and Ploi, automating provisioning, SSL lifecycle, and database backup routines.
- Apply AI-assisted engineering workflows (Claude Code, OpenAI Codex, MCP) to accelerate feature delivery, testing, and issue triage.

Stack: Laravel, PHP, Vue.js, Next.js, Gatsby, AWS, Azure, Docker

Senior Software Engineer, Backend & Full-Stack

January 2022 - March 2024

Imaginary Ones | Bubio.ai · Singapore · Remote

- Architected and built backend systems and REST APIs for two early-stage products, Imaginary Ones and Bubio.ai, using NestJS, Node.js, and Supabase.
- Implemented Supabase Edge Functions and PostgreSQL Row-Level Security (RLS) for multi-tenant data isolation, and optimized MariaDB/PostgreSQL queries and Redis caching, cutting 95th-percentile API latency by 35%.
- Built full-stack features with Nuxt.js and React, deployed through Docker and CI/CD pipelines on AWS with zero-downtime rolling deployments.
- Partnered directly with product stakeholders across distributed Singapore time zones to ship on tight release cycles.

Stack: NestJS, Node.js, Supabase, PostgreSQL, MariaDB, Redis, Nuxt.js, React, Docker, AWS

Senior Software Engineer, Backend & Full-Stack

April 2018 - March 2024

OFFEO · Singapore · Remote

- Joined as a founding engineer of a video-creation startup, building the platform backend and frontend from the ground up, and was promoted to Senior Software Engineer in 2020.
- Led backend architecture and development for a high-volume SaaS video platform, reporting directly to the CTO, supporting 100,000+ video exports and millions of media assets.
- Architected a distributed video rendering and export engine (Node.js, FFmpeg, Laravel queues, Redis, AWS S3), reducing rendering failures to under 0.1%.
- Implemented real-time export progress tracking via WebSockets and Redis Pub/Sub and managed the export server fleet for reliable high-throughput rendering.
- Maintained and scaled the mature platform from 2022 onward, keeping production stable while new-product development ran in parallel.
- Developed cross-platform Electron desktop apps for macOS and Windows and mentored junior and mid-level engineers through code reviews.

Stack: Laravel, Node.js, Vue.js, Nuxt.js, FFmpeg, Redis, AWS, Docker, Electron.js, MariaDB

Senior Web Developer / Team Lead

January 2016 - January 2018

Skubbs Inc. · Philippines

- Developed and maintained client websites, from custom PHP/Laravel applications to WordPress themes and plugins.
- Promoted to Team Lead in January 2017; managed a team of developers, coordinated directly with clients, and standardized Git workflows across GitHub, Bitbucket, and GitLab.

Stack: Laravel, Node.js, PHP, MySQL, WordPress

Junior Web Developer

May 2014 - January 2016

Open Access BPO · Philippines

- Built and maintained company and client marketing websites with custom WordPress themes and plugins.

Stack: WordPress, PHP, MySQL, JavaScript, jQuery

Junior Web Developer

November 2013 - April 2014

AGR Operations Manila · Manila, Philippines

- Created web pages for clients, translating Photoshop designs into responsive, cross-browser HTML/CSS.

Stack: HTML, CSS, Photoshop

SELECTED PROJECTS

ExpresswayPH (https://expresswayph.com)

Founder & Lead Developer

Web-based platform helping drivers navigate Philippine expressway exits more efficiently, solo-built from system architecture and backend logic to frontend UI/UX and deployment.

- Features real-time toll calculations, route planning, and fuel cost estimations, serving 26,000+ monthly active users at peak (February 2026).
- Focused on usability, performance, and real-world routing accuracy for local road conditions.

Stack: Nuxt.js, Vue.js, Node.js, Tailwind CSS, Netlify, Docker

LunchOnline.us (https://lunchonline.us)

Lead Full-Stack Developer

Enterprise B2B corporate catering platform built with NestJS, Nuxt.js, PostgreSQL, Tailwind CSS, and Docker on AWS.

- Architected role-based ordering, corporate wallet systems, and automated logistics pipelines.

Stack: NestJS, Nuxt.js, PostgreSQL, Tailwind CSS, Docker, AWS

AlagaNow

Lead Full-Stack Developer

Pet-services marketplace platform in active development (pre-launch), built with modern API-first architecture using NestJS, Nuxt.js, and PostgreSQL.

Stack: NestJS, Nuxt.js, PostgreSQL
